

IL for BANZSL DICTIONARY

ABOUT

What is IL?

Please see “A Brief Guide to IL for BANZSL” for further details.

Why are different tables different formats?

Because in creating IL, I didn't always have a meticulous process. Tables without Signbank links will have them added in future where possible.

Is this the complete system?

No, this is a first draft. It contains approximately ~500 characters. The completed version of IL for BANZSL aims to have thousands of characters.

Why have you chosen to overwrite CJK+ Characters?

The use of CJK+ characters (including many non CJK characters) is a tool of convenience for now until I learn how to use a better alternative. This font is mainly intended as a demonstration and proof of concept of what IL is meant to be. Eventually I would like to build a *pinyin* style input system which converts English (GLOSS) words into IL characters.

NOUNS

GLOSS	IL Character	CJK+ Character	Grammar & Notes	Language	BSL Signbank	Auslan Signbank	NZSL Signbank
